

# Tech Tape Hook and Loop<sup>®</sup>

The Ultimate Solution for  
efficient Maintaining,  
Organizing and Securing Fiber  
Optic Cable in Data Center.

# Overview of the Product

Tech Tape Hook and Loop® is a versatile cable management solution designed for efficient organization and securing of fiber optic, Cat6, and other copper cables in data centers. The product is made from high-quality, durable materials and features a hook-and-loop design that allows for easy installation, adjustment, and reuse, making it a cost-effective and environmentally friendly option.

# Key Features of Tech Tape Hook and Loop®

## Reusable Design

The tape can be used repeatedly without losing its effectiveness, making it a cost-effective and eco-friendly solution.

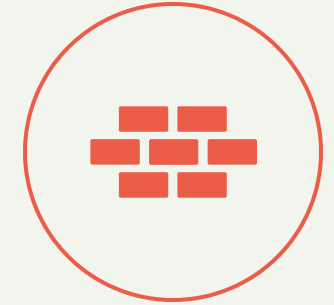

## Versatile Application

The tape is suitable for a wide range of cables, including fiber optic, copper, and power cables, making it an ideal solution for mixed data center environments.

## Secure Grip

The material is soft enough to avoid damaging or crimping cables, while maintaining a secure grip to keep them in place.

## High-Quality Construction

The tape is made from premium-grade materials that are built to last, with a flexible yet strong design that can withstand the rigors of a data center environment.

Discover the innovative Tech Tape Hook and Loop® solution for efficient and cost-effective cable organization in data centers, server rooms and IT infrastructure.

# Industry Standards

- ✓ FIN2012-BK
- ✓ ANSI/TIA 598-D
- ✓ DIN/DE 0888-BK
- ✓ UL 94V-0

## ✓ Compliance with Industry Standards

Tech Tape Hook and Loop® meets the stringent requirements set forth by ANSI/TIA 598-D and FIN2012-BK, DIN/DE 0888-BK and UL 94V-0 ensuring compatibility and integration with industry best practices for cable management.

# Versatile Applications

## Data Centers

Ideal for cable bundling and organization, maintaining an orderly environment with power, network, and fiber optic cables neatly arranged and easily traceable. Supports infrastructure upgrades with quick and easy cable adjustments.

## Server Rooms

Efficient solution for managing cables in limited spaces, preventing overcrowding of cable trays and racks, and improving air circulation around equipment by keeping cables organized.

## Telecommunications and Networking

Secures communication lines and minimizes signal interference or disconnections, while also enabling easy identification of different types of cables used for voice, data, and video transmission.

## Industrial and Manufacturing Facilities

Provides a reliable method for keeping heavy-duty power and control cables secure and organized, maintaining operational efficiency and safety. Reusable for environments with frequent cable changes during maintenance and repairs.

## Home Office and Small Business

Keeps workspaces tidy and free from tangled cords by managing a variety of cables, including USB, HDMI, and power cords, from computers, printers, and other office equipment.

## Entertainment and AV Installations

Helps keep audio and video cables neatly bundled and out of sight, enhancing the overall appearance of home theater systems or professional AV setups, with flexible and reusable adjustments as needed.

# Benefits of Proper Cable Management

Improved Airflow

Easier Maintenance and Upgrades

Equipment Protection

Reduced Signal Interference

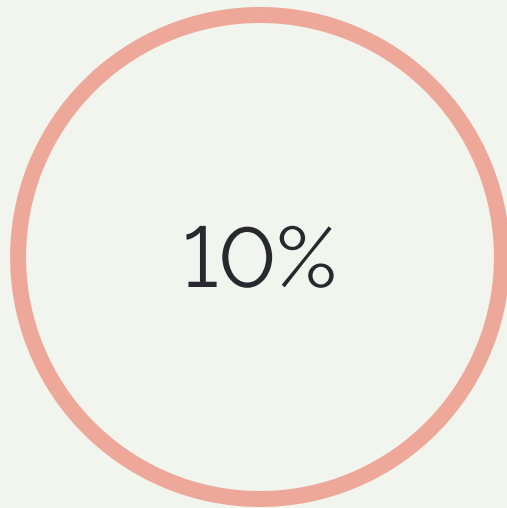

Improved Safety

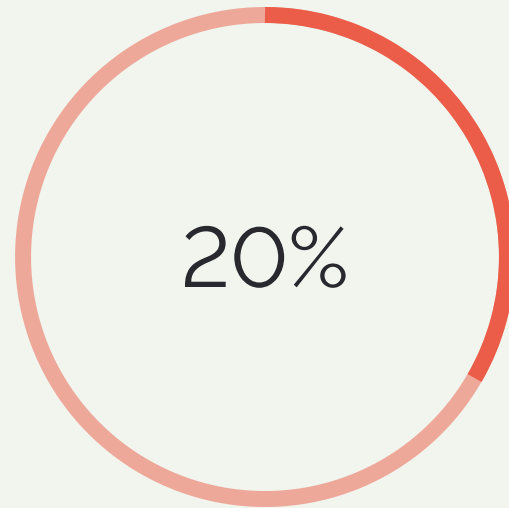

# Cost-Effective Solution

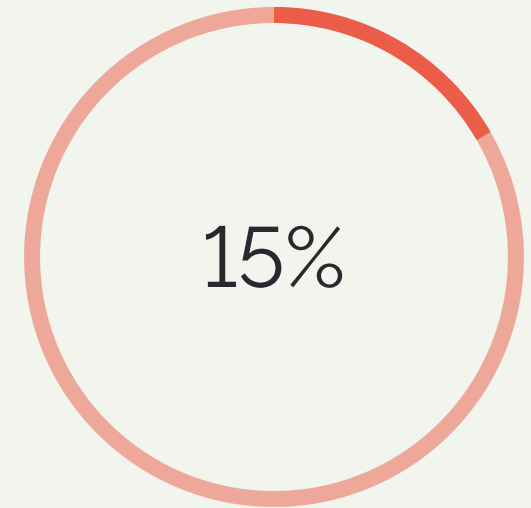

Tech Tape Hook and Loop® is crafted from high-quality materials, meeting all the regulatory certifications required for use in data centers. What truly sets it apart, is its superior flexibility and softness, making it one of the most pliable and user-friendly products available on the European market. This ensures not only compliance with industry standards but also an easier, more efficient installation and cable management process, enhancing both comfort and performance for data center professionals.

# Take Action and Partner with Us

## Revolutionize Your Cable Management

Discover how the innovative Tech Tape Hook and Loop® solution can transform your cable management process, providing a flexible and efficient way to organize and secure fiber optic, Cat6, and other copper cables in your data center.

## Experience Seamless Integration

Partner with us to integrate the Tech Tape Hook and Loop® system into your data center operations, ensuring a smooth and convenient implementation that optimizes your cable management workflows.

## Flexible and Cost-Effective Delivery

Enjoy tailored delivery options that cater to your specific needs, ensuring a seamless experience and maximizing the cost-effectiveness of the Tech Tape Hook and Loop® solution for your data center.
